

ANGEL AGUAYO

Software Developer

Chihuahua, Chih., Mexico • 614-154-2124 • angelaguayo78@outlook.com
github.com/Afaguayo • afaguayo.github.io/PortfolioWeb

PROFESSIONAL SUMMARY

Software developer with over two years of experience building desktop and web applications for real clients, from requirements to deployment, plus current phone-based experience serving customers in English and Spanish. Solid foundation in object-oriented programming (Java, C++), SQL and Python, with hands-on AI and cybersecurity projects. Bilingual, based in Chihuahua.

EDUCATION

The University of Texas at El Paso | *B.S. in Computer Science* 2025
Cum Laude • GPA 3.53/4.0 • TheDream.US Scholar • El Paso, TX

EXPERIENCE

AutoZone | *Bilingual Customer Service Representative* 2026 – Present

- Own the customer experience in English and Spanish: communicate clearly, listen to each customer's problem and find the right solution, driving customer satisfaction on every interaction.
- Resolve issues over the phone, translating technical details into plain language and turning frustrated customers into repeat ones.

Revamped.tech | *Founder & Web Developer* 2025 – 2026

- Founded a web development business and delivered 7 responsive websites for local companies (WordPress, Bluehost), managing the full cycle: requirements, development, deployment and maintenance.
- Optimized performance, responsive design and SEO; defined technical requirements directly with each client.

Thunder Lightning | *Software Developer (contract)* 2025

- Built a Java desktop application integrated with a scanner SDK, automating document digitization and transfer into the system with no manual steps.
- Designed a metadata-based classification engine with business rules and scalable storage.
- Worked directly with end users to turn operational requirements into software solutions.

AI4ALL – College Pathways Program | *Student Coordinator* 2023 – 2024

- Coordinated and mentored 6 teams (24–36 students) on Machine Learning projects, from idea to presentation.
- Developed a Python bot that automated participant registration and verification on Discord.

PROJECTS

Brochacho — AI project | *Python, Claude Code, Discord API, Whisper, GitHub Actions* 2026

- Cross-platform app (Windows/macOS) that lets me message a Discord bot from my phone and have Claude Code run on my own computer and reply, including voice notes (local Whisper transcription) and photos.
- Built a 9-step setup wizard, Wake-on-LAN to turn machines on remotely, and a permission model that pre-approves safe actions and blocks access to secrets; CI builds and tests all three binaries.

Email Leak Scanner — cybersecurity project | *Python, REST APIs* 2025

- Desktop app (Windows/macOS) and CLI that checks whether an email appears in known data breaches by querying five services in parallel, shows what was exposed and recommends what to do next.
- Checks passwords against Pwned Passwords without sending them; exports text and JSON reports; ships Windows and macOS builds.

AudioSentinel — practical utility | *C++, Win32, WASAPI, Visual Studio* 2026

- Native Windows app that measures audio level and accumulated daily exposure in real time, with a graphical dashboard, to help protect users' hearing.
- Automated build and release of the executable with MSBuild and GitHub Actions (CI/CD).

TECHNICAL SKILLS

Languages: C#, Java, Python, C++, C, SQL (T-SQL), JavaScript, TypeScript, PHP

AI & security: Claude Code, LLM tooling, speech-to-text (Whisper), Machine Learning, breach-data analysis

Microsoft stack: .NET Framework, ASP.NET Core, MVC, SQL Server, SSIS, SSRS, Visual Studio

Web & desktop: React, Next.js, Node.js, Flask, REST APIs, Tailwind CSS, C++ (Win32), Python (pywebview)

Databases & cloud: SQL Server, MySQL, PostgreSQL, Firebase, Vercel, Cloudflare, AWS

Methodologies & tools: Scrum, Agile, Git, GitHub, GitHub Actions (CI/CD), Azure DevOps, Linux

Languages spoken: Spanish (native), English (native, bilingual)
